Software Engineer

Software Engineer with 3 years of strong experience building scalable web applications across the full development lifecycle, from front-end interfaces and backend APIs to databases and deployment. Experienced in developing real-time systems, and data-driven applications, with a strong focus on performance, reliability, and delivering practical solutions.
Key Expertise: React | Laravel | Node.js | SQL Server/MySQL/MongoDB | System Design | API Integration

PROFESSIONAL EXPERIENCE

Data Analyst, Fast Distribution Corporation Aug. 2025 - Apr. 2026

Delivered several recurring data-driven analytics reports for the commercial team, and maintained 100% data accuracy.

- **Data Pipeline Development:** Led an analytics initiative to extract, clean, and transform raw transactional data into structured, report-ready datasets, streamlining the business intelligence workflow.
- **Query Optimization:** Optimized complex stored procedures(SQL) cutting processing time from 3 days to under a minute.
- **Data Visualization:** Designed interactive dashboards using Metabase, PowerBI, Excel to visualize key business metrics, enabling faster, data-driven decision-making for Commercial teams and Sales Account Planners.

Software Engineer, Fast Distribution Corporation Sept. 2023 - Apr. 2026

Maintained 50+ production features/modules including exportable reports for the SFA dashboard, supporting 100+ back office users.

- **Full-Stack Development:** Built and maintained front-end components and back-end APIs for a Sales Force Automation (SFA) dashboard, enabling real-time tracking for field sales teams nationwide across the Philippines.
- **API Integration:** Integrated Google Maps API to deliver live geolocation tracking and dynamic route of field sales personnel.
- **Performance Optimization:** Optimized front-end performance through code refactoring, reducing page load times by 80%.
- **UI/UX Enhancement:** Redesigned front-end components, boosting user engagement and responsiveness.

PROJECTS

RAVAMate - Sales Force Automation Dashboard & Real-Time Tracking

- Designed and built the front-end interface and back-end APIs for a real-time SFA dashboard used to monitor and track field sales activity around the Philippines.
- Implemented Google Maps API integration for live tracking of sales team movement.

Technologies: PHP, Laravel, SQL Server, Javascript (JQuery), Bootstrap, HTML5, CSS, Google Maps API.

Project RoMM - Business Analytics

- Extracted, cleaned, and modeled raw sales and sell-out data into structured datasets for business analysis.
- Built data models to visualize sales trends, performance gaps, and distribution opportunities across products, distributors and time periods.

Technologies: MSSQL Server, SQL, Metabase, Excel.

Bunal Brad - Court Booking & Management Platform

- Built a full-stack court booking and management web application with real-time slot availability, recurring schedule booking, and automated payment processing.
- Integrated PayMongo QR payment processing, including payment intent creation, webhook handling, and status polling.

Technologies: React, TailwindCSS, Node.js, MySQL, JWT, PayMongo API, Recharts.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology | University of San Carlos

Generative AI in Azure - Microsoft | Foundations: Data, Data, Everywhere - Google | Version Control - Meta
